A long list of loyal clientele, with many marquee names, stands testimony to relationships built over years with conscious customer focus and service excellence.

Pan India Presence
Offices in major metros
250+ support locations
2600+ strong experienced & skilled team

Core Strengths
Strong R&D and IP creation focus
Patented solutions
Expertise spans across multiple verticals

Dedicated Team
Certified pre-sales, sales & technical personnel

Strategic Principal Partnerships
HPE, Nutanix, AWS, MS, Cisco, VMWare, Fortinet, Symantec, Radware, Veritas

STRATEGIC BUSINESS UNITS

BIOMETRIC SOLUTIONS

Precision has designed & developed it's own products & solutions to address identity & access management needs in enterprises and for use in Aadhaar based programs as well.

Patented

InnalT Framework Solutions for Enterprises
2FA | eSSO, BioNIX, BioAD, EVS, Vault, TAS

InnalT SSO for Medium Enterprises
Windows & AD Login
Single Sign-on for browser based applications
Mobile App based Time & Attendance

InnalT Aadhaar:
Authentication, e-KYC, AEBAS, STQC Certified FP scanners

Patented

InnalTKey is a highly secure solution that innovatively combines PKI and Biometric to provide Passwordless Identity Authentication, Transaction Authorization and Signing.

InnalTKey Password Manager

Introducing InnalTKey Password Manager a revolutionary biometric password manager that offers a secure and convenient way to log in to the websites you use daily. This solution is available in two options - hard token as well as soft token.

InnalTKey Digital Signature Token
The InnalTKey DSC exemplifies our commitment to innovation and excellence, undergoing rigorous testing and earning certification from the Controller of Certifying Authorities (CCA). Embodying the spirit of Aatmanirbhar Bharat, this device is made without components from border-sharing countries, ensuring top-tier quality and reliability.

CLOUD SOLUTIONS

Precision provides computing services such as servers, storage, networking, software, databases and much more, over the internet. Typically, these services can be availed on a 'pay-as-you-go' basis.

As contrasted with organizations having to create and own their own data center and other computing infrastructure, the cloud model allows for hiring access to compute, storage, database and other components from a cloud service provider. Precision is an AWS Advanced Consulting Partner.

Benefits of using Cloud:

Cost, Flexibility, Ubiquitous Access, Reliability, Manageability, Security, Automated Updates.

EVOLUTION

1996 - 2005

Product Centric
